

NAAN MUDHALVAN ARTS INTERNSHIP PROGRAM 2026

Frontend Web Development using React

Project Submission Template

STUDENT NAME: G.Narmadha

YEAR: II

COLLEGE CODE: 1302

COLLEGE NAME: AM JAIN COLLEGE MINAMBAKKAM

DEPARTMENT: COMPUTER SCIENCE with AI

SEMESTER: 4

ROLL NO: 24AI008

NMID: a8dd55ff5b5a6149ced45edbbc181105

DATE: 24/06/26

TITLE: Daily Expense Analytics Dashboard

GITHUB LINK: <https://github.com/Narmu24/DASHBOARD-FOR-EXPENSE-ANALYTICS.git>

1. ABSTRACT

The Student Database Management System is a web-based application developed to efficiently manage student records. The system allows users to add, update, delete, and view student details in a structured manner. It provides an easy-to-use interface and improves data accuracy and accessibility.

2. PROBLEM STATEMENT

Many educational institutions face difficulty in managing student data manually or using outdated systems. This leads to:

Data redundancy .

Difficulty in searching records

3. OBJECTIVES

To create a centralized student database

To perform CRUD operations (Create, Read, Update, Delete)

To provide a user friendly interface

4. PROJECT SCOPE

Used in schools and colleges

Can be extended for employee management

5. TECHNOLOGIES USED

HTML – Structure of web pages

CSS – Styling and layout

JavaScript – Logic and interactivity.

6. APPLICATION FLOW

User opens the application

Dashboard is displayed

7. KEY REACT CONCEPTS USED

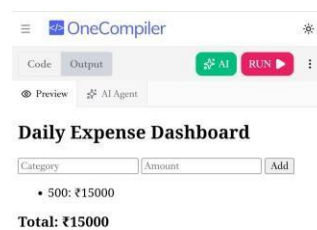

Components (Reusable UI parts)

State Management (useState)

Props (Data passing between components)

Event Handling

8. EXPECTED OUTPUT

9. CHALLENGES FACED

Managing state effectively

Connecting frontend with backend

Handling API requests

Debugging errors

Designing responsive UI.

10. LEARNING OUTCOMES

<!DOCTYPE html>

<html>

<head>

11. CONCLUSION

The student Data base management system successfully simplifying the processing of managing records using html code .
